CORPORATE CERTIFICATION

ESC has achieved and maintained
ISO 9001:2015, ISO 14001:2015,
OHSAS 18001:2007 certifications for
both supply, design and installation
scopes related to sheet piling and
piling related products.

HISTORY OF ESC

The inception of ESC occurred in 1986, when the founding partners envisaged a wide profile sheet pile unlike other traditional sheet piles. ESC's first sheet pile was driven in 1986, in Magnetic Island in the Great Barrier Reef, Australia. Since then, ESC has grown into a global piling company with international locations in almost every continent of the world. ESC Sheet Piles have successfully been used in varying locations, site conditions and design configurations.

ABOUT ESC

Further to simply supplying products we at ESC take a different approach to piling which is tailored to the customers' requirements. ESC believes that just supplying a product is insufficient and we strive to provide a level of support that is beyond customer expectations. This support ranges from general advice on the Client's options to full engineering support and design. ESC has amongst its divisions expertise in marine equipment, corrosion, trench safety and structural steel fabrication.

ESC products are produced & designed in accordance with the latest international standards as well as ISO 9000 Quality Management Systems. Other specific standards depending on the client's needs can be applied on request.

ESC has designed and supplied sheet piles to projects in every continent of the world, including Antarctica. In the last decade, ESC has successfully diversified into structural steel fabrication, synthetic sheet piling, cathodic protection, mooring bollards and marine fender systems to provide complete engineered solutions.

PRODUCT LINE

CAPABILITIES

ESC offers world class piling products and structural steel fabrications for a range of industries. With a large and flexible production capacity spanning in several locations around the world, ESC is well poised to deliver economical, innovate, timely products with excellent quality. Below is a summary table of ESC's production capacities for different products.

	Forming Process	Max Size	Thickness Range	Length	Steel Grades (Yield Strength)	Production Capacity
Sheet Piles	Hot Rolling	29.53in width	0.33 to 1.08in	19.6 to 114.82ft	240 to 430MPa	25,000mT/month
	Cold Rolling	31.49in width	0.19 to 0.63in	3.28 to 114.82ft	235 to 430MPa	7,000 to 10,000 mT/month
	Cold Forming	62.99in width	0.11 to 0.90in	3.28 to 114.82ft	235 to 430MPa	3,000 to 5,000 mT/month
Steel Pipes	LSAW	13.99ft diameter	0.25 to 3.93in	Max 328ft	235 to 485MPa	>10,000mT/month
	SSAW	10ft diameter	0.25 to 1.00in	Max 328ft	235 to 485MPa	>10,000mT/month
	ERW	2ft diameter	0.07 to 0.47in	Max 78.74ft	235 to 485MPa	>10,000mT/month
Tie Rods	Various	5.51in diameter	N/A	Max 59ft	460 to 700MPa	1,500mT/month
Structural Steel Fabrication	Various	-	-	-	-	3,000mT/month

SHEET PILING

Utilising 3 main methods of steel forming, ESC is able to offer a range of both unique and standard sheet pile profiles. With over 400 sheet piles it's catalogue, ESC can offer a full range of strengths, sizes and lengths to serve a truly global market.

COLD ROLLED SHEET PILES

HOT ROLLED SHEET PILES

COLD FORMED SHEET PILES

STEEL PIPES

Utilising LSAW, SSAW and ERW Pipe forming methods, ESC has a vast capability of steel pipe production for a multitude of applications. These applications include foundation piling, combi wall king piles, marine dredging risers, gas risers and water pipes.

SSAW STEEL PIPES

LSAW STEEL PIPES

COMBINED WALLS

Combined wall systems are formed with high strength king pile members utilised with ESC's wide range of sheet pile profiles as intermediate infills. ESC offers a wide range of Pipe, H, Box Pile sections in various grades, sizes and interlock configurations.

H KING PILES WITH INTERLOCKS

PIPE PILES WITH INTERLOCKS

FABRICATED BOX PILES

SHEET PILE INSTALLATION

INSTALLATION

ESC UAE as part of the ESC Global Group have been involved in various infrastructure works and offer a comprehensive range of piling solutions from design, supply and execution of temporary as well as permanent retention works. The construction team together with the design engineers are well experienced to handle variable ground conditions to adopt suitable installation techniques and methods. ESC have the experience in working both on-shore and off-shore environments.

ABI EQUIPMENT TO PROJECT SITE

SHEET PILE INSTALLATION

RETAINING WALL

MARINE FOUNDATION

TRENCH SHORING

ESC has fully developed its Trench Box /Trench Shield Series used as a two-sided excavation support system. It is used as a temporary earth retaining structure which allows safe access to an excavation that has been cut vertically. Stability is ensured within the trench whilst providing a minimal excavation footprint for works to be carried out. This helps prevent any damage to nearby utilities and structures.

BASE AND EXTENSION SHIELDS/BOXES

SITE INSTALLATION

INSTALLED ON SITE

BRIDGE ASSEMBLIES

STRUCTURAL STEEL FABRICATION

Over the last 5 years, ESC has expanded to delivering high quality and economical structural steel fabrications to the global market. ESC utilises its highly skilled engineering and QA/QC team boasting international qualifications in quality assurance and control, welding inspection, painting inspection, NDT testing to provide exceptionally high quality structural steel fabrications.

OFFSHORE STRUCTURES

BUILDING STRUCTURE

PRESSURE VESSELS

STEEL TOWERS

MARINE SYSTEMS

ESC has strategic partnerships with PIANC registered manufacturers with over 20 years of experience delivering marine system solutions to its valuable clients. ESC's global network offers marine furniture products such as mooring bollards, marine fenders and its accessorise.

MARINE FENDERS

MOORING BOLLARDS

UHMW PE PADS

VINYL SHEET PILES

OTHER FOUNDATION SOLUTION PRODUCTS

ESC is able to offer full foundation piling solutions with products such as: vinyl sheet piles, tie rods, pile guides, strutting system, corrosion protection and cathodic protection anodes.

TIE RODS

CATHODIC PROTECTION

SHEET PILING GUIDES

SURFACE PREPARATION

PROTECTIVE COATING

STRUTTING SYSTEM

SHEET PILE INTERLOCK SEALANTS

CONNECTORS

PILE DRIVING SHOE

LIFTING HOLES

Product Applications

ESC's wide product range have been used in a multitude of applications in various global locations. ESC typically supplies a large range of products per project. The figure below contains both an isometric illustration of some of the applications with a callout showcasing one of ESC's global projects. Some typical project applications include:

- Ports, Piers, Harbours & Jetties
- Rivers & Waterways
- Basement & Underground Parking Construction
- Bridge Abutments & Bridge Structural Steel Components
- Temporary Excavations
- Shoring for safe excavation works
- Slope Protection
- Storm Protection
- Water-tight dry excavations in water
- Steel Building Components
- Offshore & Onshore Risers
- Offshore Steel Structures - Pontoons, headstock, Dolphins, Gangways
